## SUMMARY

---

**Senior Global Technical Product Manager** with 15+ years leading complex, cross-functional delivery of AI/ML platforms, automation, robotics, and distributed cloud systems. Proven in managing large R&D investments, owning end-to-end SDLC execution, mitigating system dependencies and technical risk, and delivering resilient, scalable architectures that drive measurable outcomes across defense, industrial, and enterprise environments.

## PROFESSIONAL EXPERIENCE

---

### AI/ML Technology Solutions | Remote – Austin, TX

Aug 2020 – Present

#### Technology & Innovation Director

- **AUTMHQ:** Delivered production-grade API-driven automation using OpenAI + Power Platform, reducing onboarding effort 30% and increasing developer throughput 20x through workflow orchestration and systems integration.
- **Athena AI:** Acted as embedded Technical Product Manager for Teal-2 launch—aligning product, engineering, and DoD stakeholders; defined integration requirements, delivery milestones, and supported AUSA strategy and Teal-2/Tomahawk integration path.
- **Shield AI:** Built first transparent \$25M I-R&D STRAP, translating autonomy strategy into executable technical roadmaps, defining system dependencies, UGV/VBAT integration risks, and early X-BAT technical concepts.
- **eXeL AI:** Owned end-to-end technical roadmap and delivery for Sensor Fusion AI-Kit and edge/cloud deployments; shipped Voice API, vision, control-loop systems, generated \$75K revenue, and trained global teams.
- **Grand Isle Shipyard:** Optimized Stage-Gate workflows with NPV/ROI, identified execution and integration risks on 5D robotic plasma profiler, and partnered with leadership to pursue EPC partnerships and accelerate competitiveness.

### FLIR Systems | Santa Barbara, CA

Oct 2019 – Jul 2020

#### Product Manager - R&D Innovation Portfolio

- Owned execution governance and delivery visibility across a \$200M R&D portfolio, consolidating 10 Stage-Gate processes into a single Rack-and-Stack system enabling \$25M in cost reductions, contributing to Teledyne acquisition of FLIR (\$8B).
- Delivered quarterly technical execution, dependency, and risk reviews to CEO, CFO, and CTO, establishing execution metrics (Say/Do, NPD vitality, dependency risk).
- Served as TPM for external integrations with Amazon and [Boston Dynamics SPOT](#) integrations, coordinating software, hardware, and partner teams while enhancing internal tooling to sustain delivery cadence.

### Honeywell – UOP | Des Plaines, IL

Jun 2012 – Mar 2017

#### Strategy & Growth Manager - BD

- Led cross-functional STRAP/AOP execution for a \$3B revenue operation, achieving 12% five-year CAGR and 17% operating income growth through disciplined execution management.
- Served as execution lead on high-margin BTX product launch ([ADS-47 Parex Process](#)), owning technical value modeling, delivery alignment, and securing a \$65M pay-for-performance contract.
- Selected by CEO to drive X-Matrix execution across 8 businesses, aligning product, engineering, R&D, operations, and finance teams.

## Multiple Earlier Career Experiences | Austin + Houston, TX

### Technical Business Analyst

2003 – 2012

- **BASF:** Led post-merger integration reporting for a \$1.5B budget, building operational and financial execution dashboards for 40 product and sales leaders; supported \$60M export revenue.
- **GHGT Project:** Designed \$492M amine system model in Aspen Plus, contributing 500+ hours to large-scale system modeling, validation, and financial feasibility analysis.

## MILITARY LEADERSHIP

---

- **Army Reserves (301st MEB): Team Lead, Air Defense (14G):** led mission planning, real-time system operations, and readiness execution for battle management systems.
- **USAF Reserves:** Aircraft Maintenance Technician (2A773): led maintenance teams, delivering ~\$5M annual cost savings through process optimization and technical execution.

## EDUCATION

|                                                                                                                                                              |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>The University of Texas at Austin</b>   B.S. in Chemical Engineering<br>Minor: Business Foundations, <b>Certifications:</b> Engineer-In-Training [E.I.T.] | Aug 2002 – Dec 2008 |
| <b>Auburn University</b>   MBA                                                                                                                               | Aug 2014 – Dec 2016 |
| <b>Harvard Business Analytics Program</b>   Certificate<br>Pitch Winner: <a href="#">eXeL AI</a>                                                             | Jan 2020 – Mar 2022 |
| <b>University of Texas, McCombs</b>   Post Graduate Certificate in AI/ML                                                                                     | Nov 2020 – Aug 2021 |

## SKILLS & OTHER

---

**Product, Program & Strategy:** Technical Product Management (TPM), Technical Program Management, R&D Portfolio Management, Stage-Gate, STRAP/AOP, Roadmapping, Requirements Definition, Dependency & Risk Management, SDLC Execution, NPV/ROI Modeling, M&A Analysis, Design Traceability Matrix (FDA/FAA)

**AI, Systems & Cloud:** AI/ML, Voice APIs, Edge AI, Sensor Fusion, Control Loops, Lane Detection, Robotics & Autonomous Systems, Computer Vision, API Integrations, Automation Platforms, Multi-Cloud Architectures, AWS, GCP, Cloud & Edge Deployments, Python, TensorFlow, SQL, R

**Tools, Data & Delivery:** Agile, Scrum, Jira, Microsoft TFS, Trello, Power BI Pro, Tableau, Salesforce (SFDC), Dynamics CRM, SAP, SAP BW, Oracle BI, Microsoft Access, Aspen Plus, Microsoft Teams, Planner
