ALEX SEGUIN

DEFENSE PRODUCT / PROGRAM LEADER | EDGE AI • ROBOTICS • SENSOR FUSION • AUTONOMY • C2

Austin, TX | 512.808.8745 | explore@eXeL-AI.com | linkedin.com/in/eXeL-AI | U.S. Citizen | **ACTIVE SECRET**

EXECUTIVE PROFILE

Product and program leader with 12+ years across defense, aerospace, industrial sensing, AI/ML, robotics, UAS, sensor fusion, and integrated hardware-software systems. Translate operator needs, field evidence, and complex engineering into roadmaps, requirements, investment decisions, integrations, prototypes, launches, and trusted human-machine workflows. Current Army Reserve 14G Air Defense Battle Management NCO with hands-on Sentinel radar and FAAD C2 mission-planning exposure; prior Air Force C-5 aircraft-maintenance Technical Sergeant. Experience spans Shield AI V-BAT 128, Athena AI / Teal 2, FLIR robotic sensing, edge perception, and human-in-the-loop mission planning.

DEFENSE & AUTONOMY CAPABILITIES

Defense AI • Collaborative Autonomy • Real-Time Sensor Fusion • Edge AI / Computer Vision • Robotics • UAS / UGV • Human-in-the-Loop / Human-on-the-Loop Concepts • Multi-Domain C2 • Degraded-Communications Constraints • Hardware + Software Integration • PRDs / Roadmaps / Acceptance Criteria • R&D / IR&D • Agile / Scrum • Active Secret

RELEVANT EXPERIENCE

U.S. Army Reserve **Oct 2025 – Present**

Staff Sergeant (SSG) | 14G Air Defense Battle Management

- **AIR DEFENSE C2:** Operate within Sentinel radar and FAAD C2 mission-planning environments, applying real-time track data, air-picture awareness, engagement planning, communications, and human judgment under time pressure.
- **OPERATOR PERSPECTIVE:** Bring direct field context to sensor-to-decision workflows, operator workload, mission planning, and autonomy concepts that extend human capability while preserving accountable judgment.

eXeL AI | Austin, TX **Nov 2024 – Present**

Senior Product Manager | Edge AI, Sensor Fusion & Autonomy

- **SENSOR FUSION:** Own SensorFusion-2525, a software-first edge-perception application using computer vision, object detection, structured labeling, and multi-source sensing concepts on phone and PC.
- **MISSION SYSTEMS:** Develop Security-2525 mission-planning concepts connecting sensing, system state, operator approval, and human-in-the-loop decision support; define requirements, acceptance criteria, technical tradeoffs, and validation priorities.
- **INNOVATION + IP:** Inventor on sensor-fusion patent US20220164611A1, cited twice by Apple; use rapid AI-assisted prototyping to turn technical concepts into testable product workflows.

State of Texas | Austin, TX **Nov 2024 – Present**

Technology & Operations Professional

- Support technology-enabled public-sector operations in a regulated environment requiring disciplined execution, accurate records, issue follow-through, and stakeholder coordination.

AI/ML Technology Solutions | Austin, TX **Sep 2021 – Oct 2024**

Product & Innovation Consultant | AI/ML, Autonomy & Defense

- **SHIELD AI | Sep 2021 – Jun 2022:** Developed Shield AI's first $25M internal R&D financial plan and five-year product cases for V-BAT 128, UGV collaboration, autonomy investment, technical risk, cost/resource tradeoffs, and roadmap sequencing.
- **ATHENA AI | Jun 2022 – Dec 2022:** Supported U.S. requirements, AUSA demonstrations, Teal 2 launch activities, and Tomahawk Robotics partner integration across AI vision, UAS payload, connectivity, latency, operator workflow, and multi-platform constraints.
  Teal 2 Launch: http://tinyurl.com/Teal2-Athena-AI

De-Risking Strategies, LLC | Austin, TX **Jul 2020 – Aug 2021**

AI/ML Innovation Manager

- Converted emerging AI/ML, sensing, and robotics concepts into requirements, technical roadmaps, business cases, prototypes, partner strategies, and cross-functional execution plans.

FLIR Systems | Santa Barbara, CA **Oct 2019 – Jul 2020**

Senior Product Manager | R&D Innovation Portfolio

- **$200M R&D PORTFOLIO:** Supported governance and prioritization across thermal, multispectral, sensing, AI, robotics, software, and new-product programs; tracked spend, dependencies, maturity, gates, risk, and scenario decisions.
- **MUVE C360 + BOSTON DYNAMICS SPOT:** Led the integration effort, coordinating product requirements, chemical sensing, robotic platform, software, field-use considerations, partner alignment, and demonstration readiness.
- **~$25M COST IMPACT:** Partnered with engineering and business leadership on R&D productivity initiatives contributing approximately $25M in Q1–Q2 cost reductions.

SOFTWARE, SENSING & PRODUCT LEADERSHIP

Luminex Corporation | Austin, TX **Dec 2018 – Sep 2019**

Product Manager | IVD Software

- Owned customer and product requirements for the xMAP / INTELLIFLEX software ecosystem, translating VOC into prioritized capabilities, roadmaps, cost/pricing models, and release decisions.

Fluke Corporation | Everett, WA **Apr 2017 – Aug 2018**

Product Manager | Global Hardware & Software

- **AGILE SOFTWARE | FLUKE CONNECT:** Worked with Agile/Scrum software teams across connected-instrument, desktop, mobile, and web workflows, translating VOC and product requirements into prioritized capabilities, iterations, and release decisions.
- **GLOBAL SENSING PRODUCTS:** Led commercialization across thermal, acoustic, and industrial imaging products spanning sensing hardware, software, connected diagnostics, VOC, pricing, packaging, and launch readiness.
- **~$20M FIRST-YEAR REVENUE:** Helped launch the Fluke ii900 acoustic imager through VOC, requirements, rapid prototyping, pricing, lifecycle planning, and cross-functional launch execution.

Honeywell UOP | Des Plaines, IL **Jun 2012 – Mar 2017**

Strategy & Growth Innovation Manager / Sr. Product Marketing Specialist

- **ENTERPRISE STRATEGY:** Built the five-year STRAP and eight X-Matrices supporting a roughly $3B business, translating strategy into investment priorities, metrics, roadmaps, and accountable execution.
- **$65M LAUNCH VALUE:** Developed requirements, value proposition, pricing, business case, and commercialization support for a BTX product launch representing approximately $65M in value.
- **$200M INDUSTRIAL PORTFOLIO:** Co-managed approximately $200M in annual aromatics products, balancing customer requirements, supply constraints, pricing, profitability, lifecycle decisions, and growth priorities.
- **GROWTH + EXECUTION:** Built strategy and operating rhythms across a roughly $3B business during a period associated with 17% operating-income CAGR, linking technical roadmaps to investment and commercial decisions.

MILITARY TECHNICAL FOUNDATION

U.S. Air Force Reserve **Sep 2002 – Nov 2017**

Technical Sergeant | C-5 Galaxy Aircraft Maintenance

- **15 YEARS AIRCRAFT MAINTENANCE:** Led personnel supporting fabrication, repair, sustainment, quality, and readiness of C-5 Galaxy components in a high-reliability military aviation environment.
- **$2M ANNUAL WORKLOAD:** Directed approximately $2M annually in repaired and fabricated components, coordinating schedules, technical quality, safety, documentation, and mission readiness.
- **TECHNICAL EXECUTION:** Coordinated fabrication and repair involving composites, sheet metal, cables, and hydraulic/pneumatic tubing while meeting technical-order, quality, safety, and aircraft-readiness requirements.

SELECTED PROOF OF WORK

- SensorFusion-2525 — Edge perception, computer vision, object detection, labeling, and sensor-fusion concepts.
- Security-2525 — Mission planning and human-in-the-loop decision support.
- Teal 2 Launch — Athena AI / Teal 2 U.S. launch and partner context.
- MUVE C360 + Spot — Robotic chemical-sensing integration led at FLIR.

DEFENSE MISSION SYSTEMS AT A GLANCE

- ROBOTICS + AUTONOMOUS SYSTEMS: Led MUVE C360 + Boston Dynamics Spot integration; product experience across thermal, acoustic, chemical, and multimodal sensing.
- AUTONOMY + MULTI-PLATFORM INTEGRATION: Shield AI V-BAT 128 / UGV collaboration cases; Athena AI / Teal 2 / Tomahawk integration across UAS, AI vision, connectivity, and operator workflows.
- C2 + HUMAN-IN-THE-LOOP MISSION SYSTEMS: Army Sentinel / FAAD C2 operator context plus Security-2525 mission planning, sensor-to-decision workflows, and operator approval concepts.

EDUCATION

Harvard Business Analytics Program — 24-Month Executive Certificate | 2020–2022

The University of Texas at Austin, McCombs — Post-Graduate Certificate, Artificial Intelligence / Machine Learning | 2020–2021

Auburn University — Master of Business Administration | 2014–2016

The University of Texas at Austin — B.S. Chemical Engineering | Engineer-in-Training
