

Who Are We?

Experienced Sensor and AI/ML Development Teams

De-Risking global development through multi-partner collaboration

Advancing off-the-shelf AI/ML models & deploying multi-sensor solutions

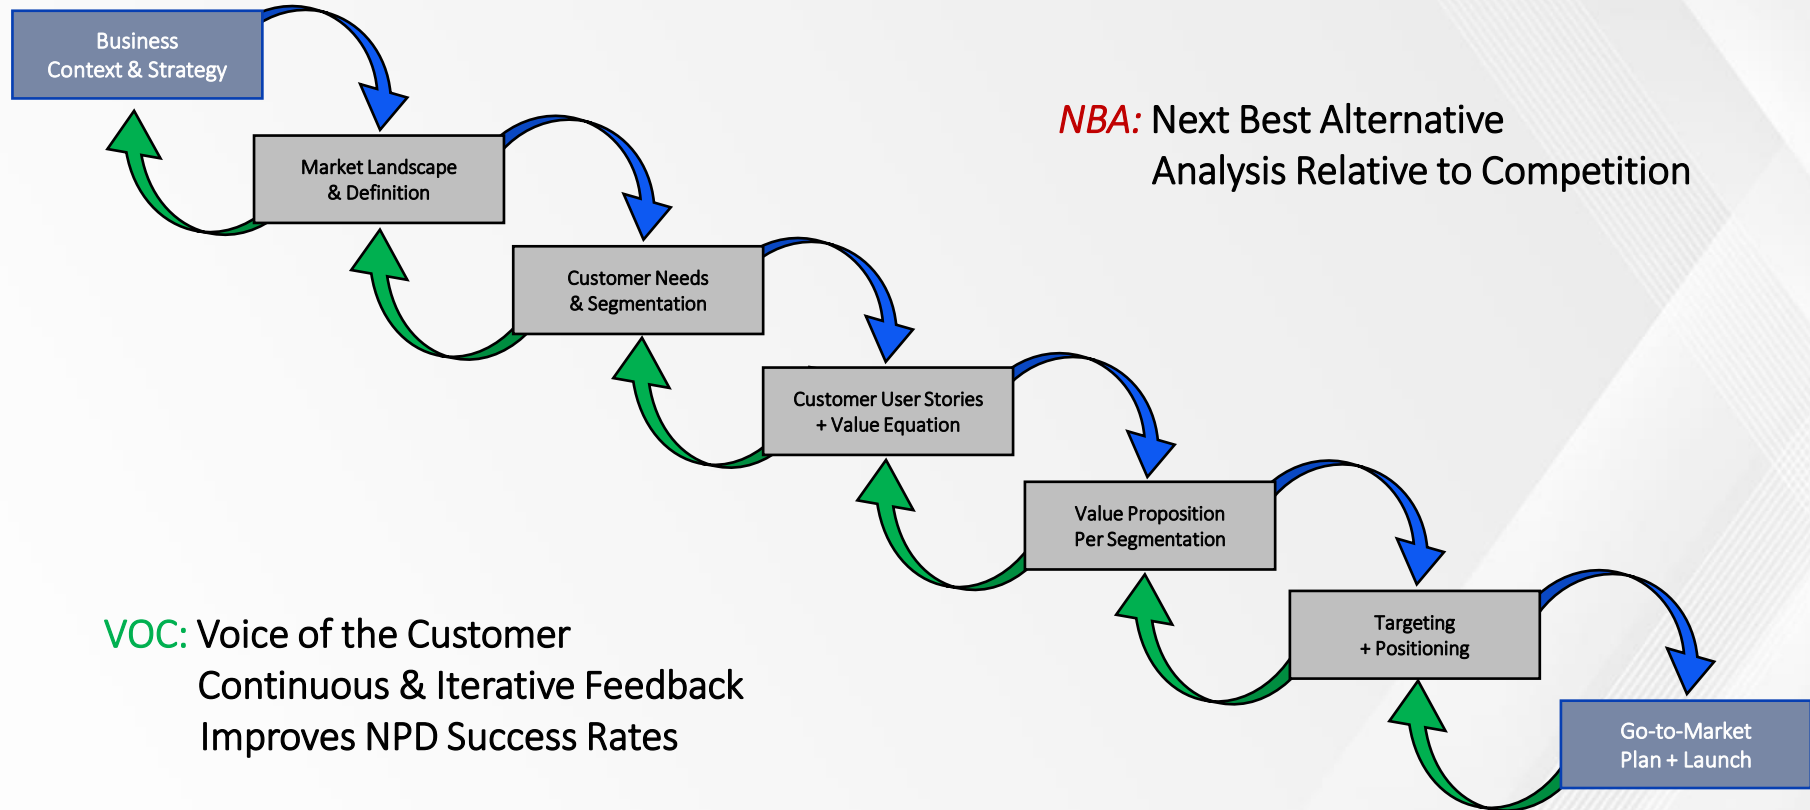

ALEX SEGUIN

New Product Strategy: Addresses Risks vs Competitive NBA

Robust Stage-Gate: Collaborative Input Improves NPD Success

Project Resilience

Customer CONOPS: *Project Resilience*

CONOPS

1

Real-Time Alerts: Platform receives and relays real-time weather alerts from authoritative sources.

2

User Reporting: Users assess and report on-ground situations, enhancing situational awareness.

3

Alert Dissemination: Alerts are coordinated and disseminated to entities and the public.

4

Resource Management: Entities manage resources with inventory tools and gap analysis.

5

Volunteer Coordination: Volunteers sign up, match to needs, and use communication tools.

6

Public Communication: Multi-channel broadcasts provide alerts and information to the public.

7

Preparedness Information: Users access resources, checklists, and guides for weather events.

Future
Capabilities

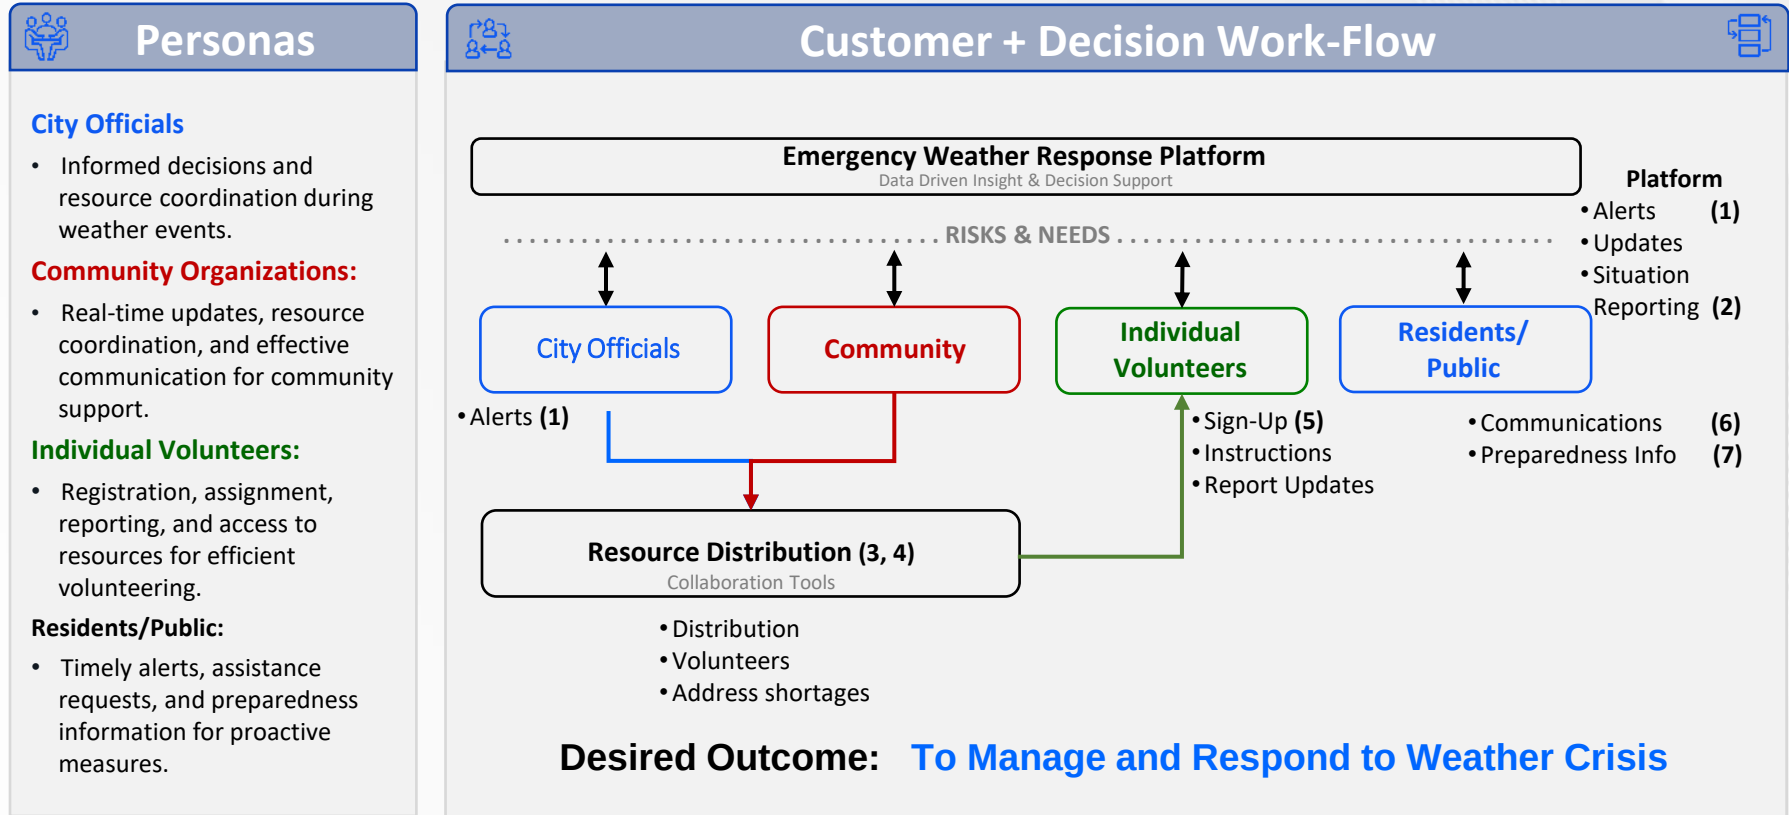

Security and Scalability: Ensure data protection, compliance, and scalability during high-demand periods.

Work - Flow by Persona: **Project Resilience**

Business: AUTMHQ

Project #: 23.003W

Customer Pain Points: *Project Resilience*

Business: AUTMHQ

Project #: 23.003W

Personas

City Officials

- Informed decisions and resource coordination during weather events.

Community Organizations:

- Real-time updates, resource coordination, and effective communication for community support.

Individual Volunteers:

- Registration, assignment, reporting, and access to resources for efficient volunteering.

Residents/Public:

- Timely alerts, assistance requests, and preparedness information for proactive measures.

Pain Points

City Officials

- Lack of real-time information during weather events.
- Inefficient resource coordination.
- Limited public communication channels.

Community Organizations:

- Lack of real-time information during weather events.
- Inefficient resource coordination.
- Limited public communication channels.

Individual Volunteers:

- Lack of real-time information during weather events.
- Inefficient resource coordination.
- Limited public communication channels.

Residents/Public

- Lack of real-time information during weather events.
- Inefficient resource coordination.
- Limited public communication channels.

Note: Example Only, Modify as Needed

Customer Problem Statement: *Project Resilience*

Business: AUTMHQ

Project #: 23.003W

1	Problem Statement	- Inefficient response during weather events, resource allocation challenges, and limited public communication channels hinder effective emergency management.
2	Customer Outcomes	- Timely, accurate information for informed decisions. - Efficient resource allocation for improved response. - Enhanced community resilience through effective communication.
3	Customer Why's	- Desire for better response coordination and public safety. - Need to streamline resource management during crises. - A wish for stronger community support during emergencies.
4	Problems with the Status Quo	- Slow response due to information gaps. - Inefficient resource allocation leads to shortages. - Limited communication channels hinder community resilience.

Project Overview

- Project Summary
- **Project Resilience** is a comprehensive emergency **weather response and coordination platform** designed to gather real-time data and streamline resource allocation for efficient disaster management.
 - In 2024, **Project Resilience** seeks to transition into an Alpha Demo phase, with a primary focus on deploying the core system and undertaking a global system expansion. This expansion will encompass various model variants, including Beta, MVP, and US-specific systems, to address diverse needs, achieve desired outcomes, and offer comprehensive solutions on a global scale.

Product Strategy / Value Proposition

- Product Strategy
- **Launching Project Resilience:** Streamlined Disaster Coordination Platform.
 - **Alpha Demo Phase:** Global Expansion for Enhanced Disaster Management.
 - **Diverse Models:** Beta, MVP, and US-Specific Solutions Worldwide.
- Value Proposition
- Real-time disaster data.
 - Global system expansion.
 - Efficient resource allocation.
 - Enhanced disaster management.
 - Diverse system variants.
 - Comprehensive solutions worldwide.
